PROFESSIONAL SUMMARY

Civil Engineering Graduate with hands-on experience in hydraulic modeling, infrastructure projects, and engineering research. Experienced in developing hydraulic simulations using HEC-RAS and HEC-HMS, conducting engineering data analysis with Python or R-Studio, and supporting toll road construction projects through internship experience. Authored an international conference publication and passionate about applying analytical and engineering skills to contribute to sustainable infrastructure and water resources development.

EDUCATION

Universitas Jember (2022 – 2026)

Bachelor of Civil Engineering — IPK: 3.63 / 4.00

Relevant Courses: Engineering Statistics, Hydraulics, Hydrology, Numerical Methods, Water Resources Engineering, Construction Management.

TECHNICAL SKILLS

- **Programming :** Python
- **Data Analysis & Database:** Python, R-Studio, Microsoft Excel
- **CAD / BIM / Engineering Software:** HEC-RAS, HEC-HMS, SWMM, AutoCAD
- **GIS & Mapping Software:** ArcGIS Pro, QGIS, Google Earth Engine
- **Office & Developer Tools:** Microsoft Office, Google Workspace

WORK EXPERIENCE

PT. Parama Karya Mandiri KSO — Civil Engineering Intern

Probolinggo, Indonesia | January 2025 – February 2025

- Assisted site engineers in supervising construction activities for the Probolinggo–Banyuwangi Toll Road Development Project (Package 3B).
- Conducted field observations to monitor construction progress and verify work execution against project plans.
- Participated in quantity measurement and technical reporting under the supervision of project engineers.
- Collaborated with engineers and site personnel to ensure construction activities complied with project specifications and safety procedures.

PROJECTS

Spatial Planning and Regional Infrastructure Planning (SID) (November 2024 – December 2024)

Civil Engineering Team Member - Preparation of Spatial Planning and Regional Infrastructure Planning (SID)

- Participated in the preparation of Survey, Investigation, and Design (SID) documents for regional infrastructure planning.
- Conducted field surveys and collected technical data to support engineering analysis and planning.
- Assisted in analyzing existing site conditions and infrastructure requirements.
- Prepared technical documentation, engineering reports, and supporting project deliverables.

Research Grant Project | Universitas Jember

(May 2025 – Juli 2025)

Research Team Member - Hydraulic Modeling of Irrigation Channels Using HEC-RAS

- Conducted field surveys and collected hydraulic data from irrigation channels.
- Developed hydraulic simulation models using HEC-RAS and HEC-HMS.
- Processed and analyzed engineering data using Python and statistical methods.
- Contributed to manuscript preparation for an international conference publication.

PUBLICATIONS

Impact of hydraulic characteristics on irrigation canals failure in Jember, Indonesia

IOP Conference Series: Earth and Environmental Science

Published: September 2025

DOI: 10.1088/1755-1315/1593/1/012024

LEADERSHIP & ORGANIZATION

Civil Engineering Student Association (HMS)

(Januari 2024 – Desember 2024)

Entrepreneurship Division Member

- Assisted in planning and organizing entrepreneurship programs and fundraising activities to support student organization initiatives.
- Collaborated with division members to manage the preparation and execution of business-oriented events and merchandise sales.
- Supported event coordination, logistics, and communication to ensure smooth implementation of entrepreneurship activities.

LANGUAGES

• **Indonesian** : Native or bilingual proficiency | • **English** : Limited working proficiency

ADDITIONAL INFORMATION

- **Driving License**: Class C (Active)
- **Relocation**: Yes, Available for Relocation Across Indonesia
- **Travel**: Yes, Available for Business Travel
- **Visa / Passport Status**: No Active Passport
